

The Best Place to Submit Your Invention Ideas

When you are looking for a place to submit your [invention idea](#), you need to be aware of the various rules. Most companies will not accept your ideas unless they are protected by a patent. Before you submit your idea, you should check with the US Patent and Trademark Office to make sure that it is not already owned by someone else. Also, some companies require that you sign a Non-Disclosure Agreement before they will consider your idea.

InventHelp

When you submit your invention idea to [Invent Help](#), you can expect to have your idea thoroughly researched. The firm uses 3-D computer-aided design (CAD) technology to create a digital model of your product. It then uses high-tech 3D printers that use patented Fused Deposition Modeling (FDM) technology to create a working prototype. Invent Help also helps you to test your new idea against existing products and competition. You'll also get practice in giving an elevator pitch and gathering information about your target market.

The service also helps inventors overcome challenges along the way. [InventHelp](#) experts provide expert advice and guidance. They can help you avoid common mistakes and ensure that your invention ideas are protected. They also help you develop a working prototype of your invention so you can get the word out about your product in the market.

FastCap

There are many ways to submit your invention ideas. You can submit them to a number of companies online. Most of these companies require a description of your product and pictures or mock-up drawings. You can also submit a product that has already been produced and sold. Using these resources will help you get your idea noticed by companies that will help you make your product a reality.

One such company is FastCap, a company specializing in manufacturing woodworking products. The company works with innovators in this field to develop and manufacture woodworking products. FastCap only accepts one idea out of 1,000, but they will pay you between five and 10% of the total cost of the product.

Dorman Products

If you are an inventor with a great idea, you can submit it to Dorman Products, a company that specializes in automotive parts and supplies. They are always interested in new ideas and may even pay you for your invention if it is innovative and useful. You can submit your idea using the form on their website and wait for a response. This company pays \$500 for successful submissions and may even offer you a licensing agreement for your product.

The company is a leading automotive aftermarket manufacturer. It works with auto repair professionals to create new parts and accessories. This is a \$200 billion industry, and the products are sold at half the cost of original equipment manufacturers. The company is constantly researching the market to come up with better solutions. It asks mechanics and auto technicians for ideas about new parts and makes them available to consumers at a fraction of the cost. This gives consumers the freedom to DIY and save money at the same time.

Sharper Image

If you're looking for the best place to submit invention ideas, look no further than Sharper Image. This leading MNC focuses on high-tech products and cutting-edge technologies. It has a team dedicated to evaluating invention ideas. They accept ideas on all topics and will respond within a month or two.

You can submit your idea to Sharper Image and get the attention of top gadget companies. They are always on the lookout for the next big thing. You can even get a monthly royalty check from them. They also do not require patents, which is great news for aspiring inventors.

Ford Foundation

Submitting an invention idea to the Ford Foundation is a great idea if you're looking to make a big impact in society. They'll pay royalties on your idea on a monthly basis, and you don't need a patent. The Ford Foundation is a private foundation with the mission of progressing human welfare and reducing global inequality. They're always looking for new ideas, initiatives, and programs to combat poverty and inequality.

The Ford Foundation works with individuals, organizations, and companies to fight global inequality. They support innovative initiatives and create new products to help alleviate poverty. The foundation's idea process is designed to help people create new products, apps, and initiatives that improve lives. In addition to funding the development of an app, they can help you market and distribute it.

Eco-Products

If you have a product idea and want to get it in front of potential customers, Eco-Products is the place to go. The organization is dedicated to helping people improve the way they make single-use products and encourages you to submit your ideas to them. Eco-Products is looking for innovative products, materials, and processes to reduce waste and create new products that can help the environment.

Before submitting an idea to a company, you need to make sure that the idea has not already been patented. Many companies will not accept ideas without patents, so make sure to check with the US Patent and Trademark Office to see if it has been already trademarked by someone else. Also, remember that before submitting an idea to a company, most companies require you to sign a Non-Disclosure Agreement.

FundedApps

Many companies will consider your idea for a new product if it is innovative, useful, and has a high market potential. However, most submissions never get approved. In fact, only one in a hundred submissions is accepted. This means that you have a very small chance of having your product turn into a home run. But if you are confident enough in your idea, you can submit it to the website of one of these companies.

FundedApps pays for submissions and takes a 25% cut if your product makes the market. The process of submitting an idea is fairly simple. You must visit the company's website, and their experts will review your idea. Moreover, if your idea is not immediately suited for an existing product, it is possible to pitch it to a company that specializes in that particular niche. For example, Bosch focuses on technology and has operations in consumer goods, energy, and mobility.
